**INFORMATION DISCLOSURE STATEMENT**

In compliance with the Applicant's duty of disclosure under 37 CFR §1.56, Applicant brings the attached documents cited on the attached forms PTO/SB/08A and PTO/SB/08B to the attention of the U.S. Patent and Trademark Office in accordance with the provisions of 37 CFR §1.97-98.

Additionally, Applicant notes that several international and foreign references are listed that are not in English. Applicant lists in conjunction with each such reference a full translation into English of the reference where Applicant has such translation, and Applicant accordingly checks the appropriate box on Form PTO/SB/08A. Applicant further lists in conjunction with each such reference a translation of only the abstract of the reference into English where Applicant only has such translation, and Applicant also checks the appropriate box on Form PTO/SB/08A. In this scenario, the word "Abstract" is parenthetically found after the reference number to indicate that only the translation of the abstract into English is listed and not a full translation.

Appl. No. 10/543.047  
IDS dated August 8, 2005

Applicant submits that each international and foreign reference that is not translated is listed for what is disclosed in the drawings and figures thereof.

Nothing herein including the submission of the documents themselves, whether in this or any other filing—constitutes an admission by Applicant that any of the documents is prior art with respect to the present invention, or a waiver of any rights of Applicant. Indeed, while each citation includes a date, it should be understood that, whether expressly stated or not, the date specified in the citation is a date as alleged by the document or otherwise, and Applicant neither admits nor denies the correctness of the specified date at this time. Moreover, with regard to non-patent documents, Applicant neither admits nor denies that each document submitted is, in fact, a “publication” within the meaning of 35 U.S.C. § 102.

Appl. No. 10/543,047  
IDS dated August 8, 2005

This application is a continuation-in-part of, and claims priority to, U.S. Patent Application No. 10/665,169, filed September 18, 2003, which is a nonprovisional patent application of, and claims priority to, U.S. Patent Application No. 60/451,433, filed March 4, 2003.

According to 37 CFR § 1.98(d), copies of the documents are not required and have not been submitted because they are currently of record in U.S. Patent Application No. 10/665,169, filed September 18, 2003, on which this application relies for the benefit of an earlier filing date under 35 U.S.C. § 120.

Respectfully submitted,
